

# DIGITAL PORTFOLIO

STUDENTS NAME:ANBU SELVAN

REGISTRATION NO:2422K2152

NMID:CE2212D546FB93ABC01408737717

COLLEGE: Govt college of arts and science Gudalur

UNIVERSITY: Bharathiyar university

## DIGITAL PORTFOLIO

A digital portfolio which tells about the idea's and also to showcase the skill and knowledge of him .here I have created a basic portfolio in addition I induced my idea of addiction breaker on portfolio project session

## Agenda:

- Problem statement
- Project overview
- End users
- Tools and technologies
- Portfolio design and layout
- Features and functionality
- Results and screenshots
- Conclusion
- Github links

## PROBLEM STATEMENT

Today many of the companies look for skilled employees and due to regular resume the company needs to move a step ahead to find if the person has the ability but due to digital portfolio they already have an assurance of their work

## PROJECT OVERVIEW

- the project has two faces one it contains a digital portfolio for IT sector which showcase my skills and abilities and nextly I have added a addiction breake idea to it
- My portfolio contains the projects (learning system) and my skills on html,java ,java script and css
- I have a degree of [b.sc](#) computer science which I had gained ideas of programming languages and architecture of system in addition I have some problem solving skills

# End users

- Students: who can take a reference for the template and use it for their academic project or for resumes
- Recruiters: where the selection process becomes a bit liberal by the candidates work preview
- Professional: who can show case their work to get attention from their requirements group

# Tools and technologies

- TOOLS

the tools used here is the code pen that enables to write and view the output

***HTML(hyper text transfer protocol)***

which helps in defining the basic structure for portfolio and learning system

***CSS(cascading stylesheet)***

Make the webpage a bit appealing and covers the structure of html and also adds some elegance

***JAVA SCRIPT***

This helps me in making the interaction as well as the redirection of the portfolio

# Design and layout

- It has a header session that has a simple overview of skill set

Home has a simple navigation and it has some simple statements regarding myself

- The skill session has the tools that I'm coded off

The contact session has the submit type in learning system it has my contact

- I created it in a responsive layout using flex

Which could adapt as per screen size

# Features and functionality

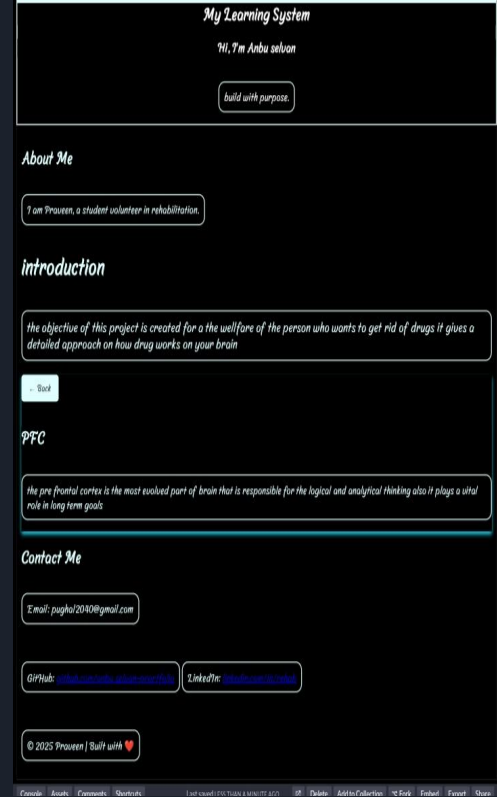

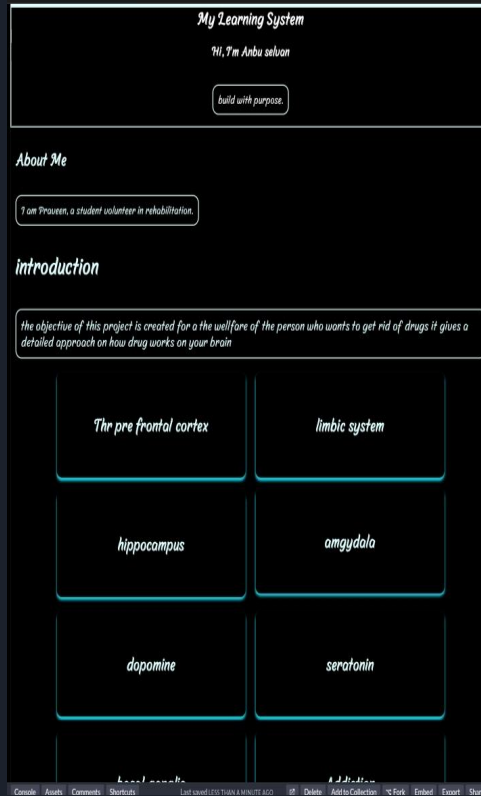

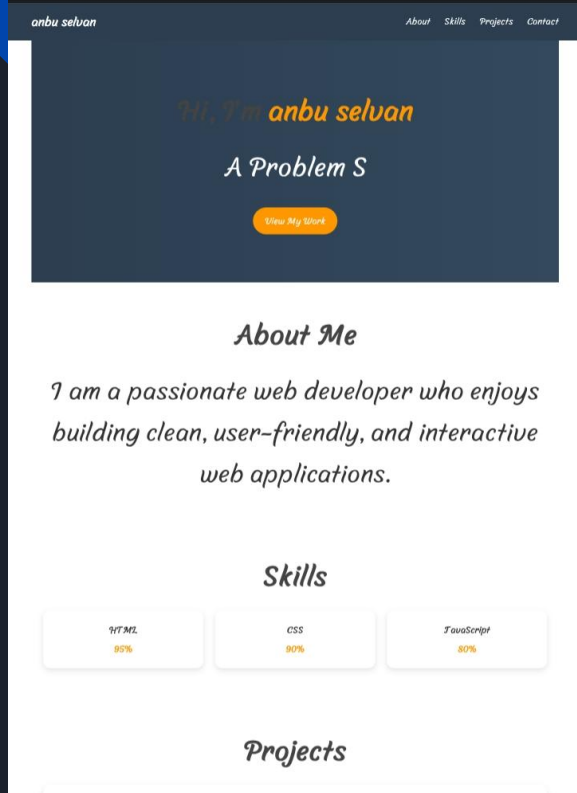

It is designed with flex layout and animation on zoom in

The project is showcased and a redirecting link is placed  
with button

It has a column of contacts

It is designed to respond differently as per the device and  
screen size

# Results and screenshots

# Conclusion

The project highlights the use of free resources to learn and create as per our well-being  
In addition the learning system project if developed could help the society which has the awareness of drugs effects and ways to get rid of  
The portfolio would benefit recruiting companies and the job seekers
